

MediaPOINTE DNS210e

Digital Network Streamer

The DNS210e is a powerful streamer designed to deliver full-motion, full-resolution graphics. In either Unicast or Multicast, the DNS210e streams XGA resolutions at up to 30 frames per second (fps) in standard MPEG-4. Audio is sent in CD-quality stereo. This network device provides an easy way to broadcast content being displayed during meetings, videoconferences or presentations. A simple web interface and RS-232 programmability make this an important tool for any meeting room.
